To whom it may concern.

Re: Global Gap Compliance.

In 2015 Plateau Compost Ltd., in conjunction with Zespri and Plant and Food Research assessed the production of compost using industry reject kiwifruit, pulp fibre and local organic greenwaste.

(M. Spiers. Plant and Food Research PFR SPTS 11380)

The investigation showed that a high quality compost can be made by using these inputs.

The compost is now available in commercial quantities, specifically made for Kiwifruit and Avocado orchards.

- Plateau Compost Ltd. products are tested regularly and achieves the New Zealand standard for Soil Conditioners and Mulches (NZS 4454:2005)
- Plateau Compost Ltd. is a fully permitted Biogro certified producer.
- Plateau Compost Ltd. is a K.V.H approved compost manufacturer and supplier.
- Plateau Compost Ltd. is an approved Zespri compost supplier and is GAP compliant. (Ref 5.3.2.)

Yours faithfully,

John Fell

Manager
